UX For Teachers

Enhancing digital education with
User Experience design

Target group

The project is addressed to teachers and educators interested in applying UX Design concepts in order to create more inclusive and engaging digital resources

The project

The project UX for Teachers – Enhancing digital education with User Experience Design is a Small Scale Cooperation Partnership in school sector (KA210-SCH) funded under the Erasmus+ Programme.

The UX ForTeachers project aims at strengthening the role of secondary school teachers, trainers and educators in designing student-centred digital environments, activities and materials, exploiting the potential of UX Design in order to improve engagement and effectiveness of distance learning in schools.

The main concrete objective is to enhance teachers' competences in assessing, designing and implementing effective digital environments/materials by applying UX design concepts.

The activities carried out

UX For Teachers – Assessment Tool

The assessment tool provides a series of materials for evaluating the level of interactivity, usability, design, accessibility and efficacy of online environments, materials and activities. The Assessment tool can help teachers analyse the students' perception and create more engaging digital materials.

The assessment tool includes Recommendations for teachers and a Questionnaire to be used with students

The recommendations have been outlined based on a qualitative and quantitative study conducted by the UX for Teachers project partners. These insights help lecturers to implement a self evaluation to harness the full potential of online educational systems and digital tools and optimize the user experience (UX) of their students.

The questionnaire can be used to collect feedback from your students on their experience using digital educational materials or environments. It analyses 5 different elements: interactivity, usability, design, accessibility, efficiency. The results can be useful to understand the students' perception and improve the materials accordingly.

UX For Teachers International training course

In the next months the project partners will organise an international training course focused on the UX For Teachers materials. The course will be delivered online.

If you are interested in attending the course, please contact us.
